PROFESSIONAL DESIGN, INSTALLATION AND MAINTENANCE OF COMMERCIAL AND RESIDENTIAL AIR CONDITIONING SYSTEMS

AscotAIR

INTRODUCING ASCOT AIR

For over 10 years, Ascot Air and Electrical has been providing exceptional air conditioning services to businesses and residences in South East Queensland.

Our team is highly experienced in designing and delivering projects ranging from luxury homes to shopping centres, corporate high-rises and universities.

As a specialist commercial Heating, Ventilation and Air Conditioning (HVAC) company, we are experts in delivering complex technical projects. Our knowledge of base building requirements and guidelines positions us as valued partners to architects, construction companies, consulting engineers and major fit out contractors.

OUR CAPABILITIES INCLUDE:

- Design and construction projects
- Chilled water, DX and refrigeration systems
- Ventilation
- Condenser water systems
- VRF heat pump and heat recovery systems
- Computer room air conditioning (CRAC)
- Building management systems
- Fresh air units

At Ascot Air and Electrical, we believe in providing the best possible service to our clients, and our memberships of both the ECA and AIRAH, ensures we are always fully up-to-date and compliant with industry changes and legislation. Working with the best products available supports this philosophy and we're proud to be authorised Daikin and Mitsubishi Electric Dealers and Warranty agents.

OUR SERVICES

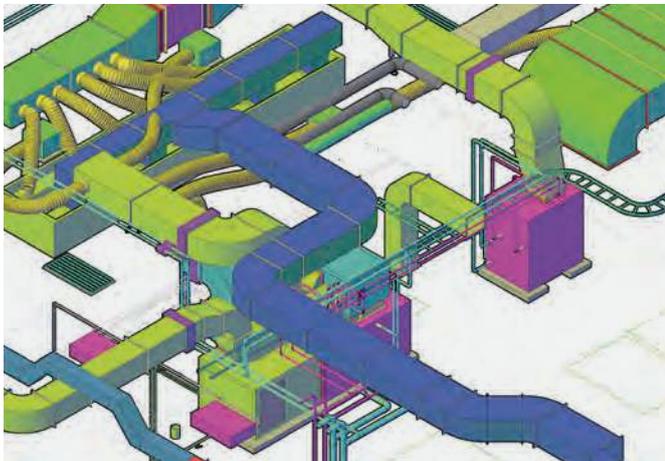

DESIGN – INSTALLATION – MAINTENANCE

At Ascot Air and Electrical we offer our clients the complete HVAC service: from designing and installing expertly tailored systems, through to providing a complete maintenance program assuring them of the maximum return on their investment. We work closely with consultants and engineers on design and construct projects, as well as partnering on large-scale tender projects.

UNIQUE, EXPERTLY TAILORED DESIGN

When designing the perfect system for our clients, we view each project as unique specifically tailoring a system to your requirements.

Our in-house team of Incorporated Engineer and Draftsman can expertly design air conditioning and mechanical services to suit any application. Providing fully coordinated drawings and precise documentation complete with 3D modelling and heat load calculations, all of our designs comply with relevant Building Codes and Australian Standards.

SUCCESSFUL PROJECT INSTALLATION

Ascot Air and Electrical is experienced in all aspects of commercial air conditioning, including multi-level buildings, refurbishments, laboratories, shopping centres and warehouses.

We boast an outstanding record of successful project delivery. Our expertise in design, combined with our focus on technical precision, has made us one of south-east Queensland's leading air conditioning providers.

OUR COMMERCIAL CAPABILITIES INCLUDE:

- Chilled water systems
- VRV/VRF systems
- 100% fresh air systems
- Car park ventilation including CO2 monitoring
- DX systems
- Packaged air conditioning systems
- Computer room controlled air conditioning systems
- Condenser water refrigeration and air conditioning systems
- BAC net gateway controls and central monitoring
- Fresh air units

UP-TO-DATE MAINTENANCE

Our Maintenance Division ensures you get the best out of your investment through providing preventative maintenance services for residential and commercial systems, including high-rise buildings, schools, office blocks, retirement villages, childcare centres, shopping centres and residential apartments.

Utilising an online 24hr asset management program allows both our clients and our service technicians to stay continually up-to-date with service information and equipment depreciation data.

HVAC Maintenance ensures our clients' systems run as efficiently as possible and through the continuous monitoring of these systems, prevent costly and untimely breakdowns.

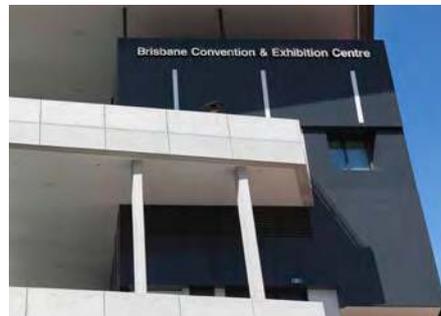

WHY ASCOT AIR?

At Ascot Air and Electrical we pride ourselves on our high level of experience, positive attitude and unequalled technical capabilities that enable us to provide the complete package, on time and on budget.

With each project managed by professional and qualified engineers, we believe that any quality solution begins with listening to the needs of our clients and then delivering a service offering that is tailored to suit their needs.

Our aim as one of Australia's leading HVAC companies, is to build solid and long lasting relationships with our clients and project partners, but consistently delivering quality products and services that exceed all expectations.

PROJECT TYPES

Our impressive project list includes high-calibre corporate developments through to a range of residential homes and complexes. We apply the same high level of professionalism and expertise to every single project.

OUR PROJECT SCOPE INCLUDES:

- INDUSTRIAL
- HOSPITALITY
- SHOPPING CENTRES
- FIT OUT
- EDUCATION
